FOR IMMEDIATE RELEASE
August 22, 2022

City of Romulus launches “Vision Romulus – Our Community, Our Future” Community Survey

As part of the newly launched “Vision Romulus – Our Community, Our Future” visioning process, the community of Romulus are being asked to take part in an important community survey. This is the first part of the engagement phase of this exciting new visioning process that aims to explore the future direction of the community and create an enduring vision for Romulus, looking out to 2030. The visioning process will result in the Romulus Community Vision Plan which will be presented in January 2030.

There will be more opportunities for the community to take part in the “Vision Romulus – Our Community, Our Future” process as the community survey will be followed by a two evening Think-Tank workshop on September 21 and 22, a Vision Survey in October and Focus Groups on November 9 and 10.

The Community Survey is important as its results will inform the front load presentation at the Think-Tank workshop, and the results will be presented via interactive charts on the “Vision Romulus – Our Community, Our Future” website at <https://lab2.future-iq.com/vision-romulus/>.

“The input from the Romulus community for this first phase of engagement via the Community Survey will be integral to the overall process” said David Beurle, CEO of Future iQ and lead facilitator for the “Vision Romulus – Our Community, Our Future” process. He continued, “We want people to let us know their thoughts about living and working in Romulus, the Vision and Values of Romulus and how they view the current direction and speed of change that is occurring within Romulus”

The “Vision Romulus – Our Community, Our Future” community survey can be taken at <https://lab2.future-iq.com/vision-romulus/>.

Read more about the project, sign up for information and learn about the extensive community engagement events coming up at the Vision Romulus – Our Community, Our Future website at <https://lab2.future-iq.com/vision-romulus/>
