

Think-Tank  
Part 1

# Council of State Community Development Agencies (COSCDA) Think-Tank PART 1

# Council of State Community Development Agencies (COSCDA) Strategic Planning Process

**We are here**

# COSCDA Think-Tank

## Part 1 – Explore Future Trends

- Macro trends shaping the future
- Key drivers shaping the future
- Rating future impact of drivers

## Part 2 – Build Scenarios

- Develop plausible scenarios of the future
- Identify expected and preferred futures
- Build strategic pillars

December 7

December 8

## AGENDA

### Thursday, December 7

- 8:30am Registration
- 9:00am Welcome and Introduction
- 9:15am Future trends shaping COSCDA's future;  
survey results and work to date
- 10:30am Identify key drivers shaping COSCDA's future
- 11:15am Build out insights about the key drivers (Part 1)
- 12:00pm Lunch
- 1:00pm Build out insights about the key drivers (Part 2)
- 2:00pm Ranking key drivers
- 3:00pm Next steps

## AGENDA

### Friday, December 8

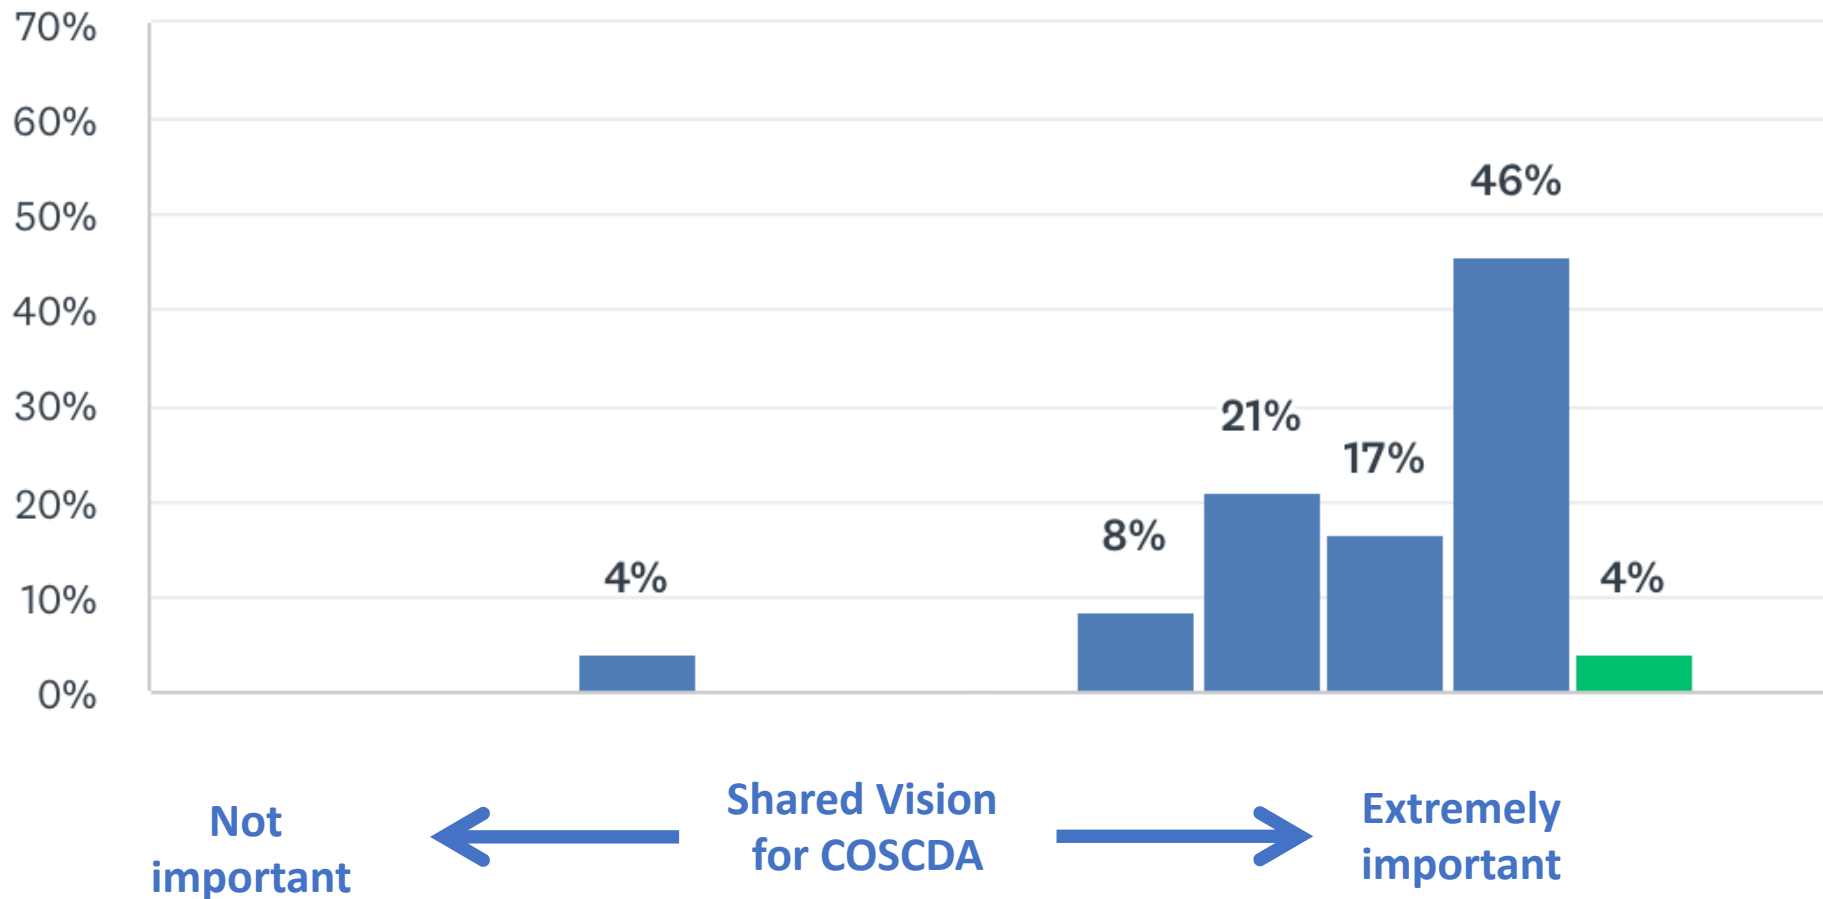

- 8:30am Recap of Think-Tank Session 1
- 8:45am Outline the Scenario Matrix
- 9:00am Scenario narrative development  
(breakout group discussions)
- 10:00am Scenario presentations
- 10:20am Examine scenario implications and outcomes
- 10:30am Identify expected and preferred futures
- 10:40am High-level strategic action brainstorming
- 11:00am Next steps and finish

How important is it to have a **SHARED VISION** for the future of COSCDA?

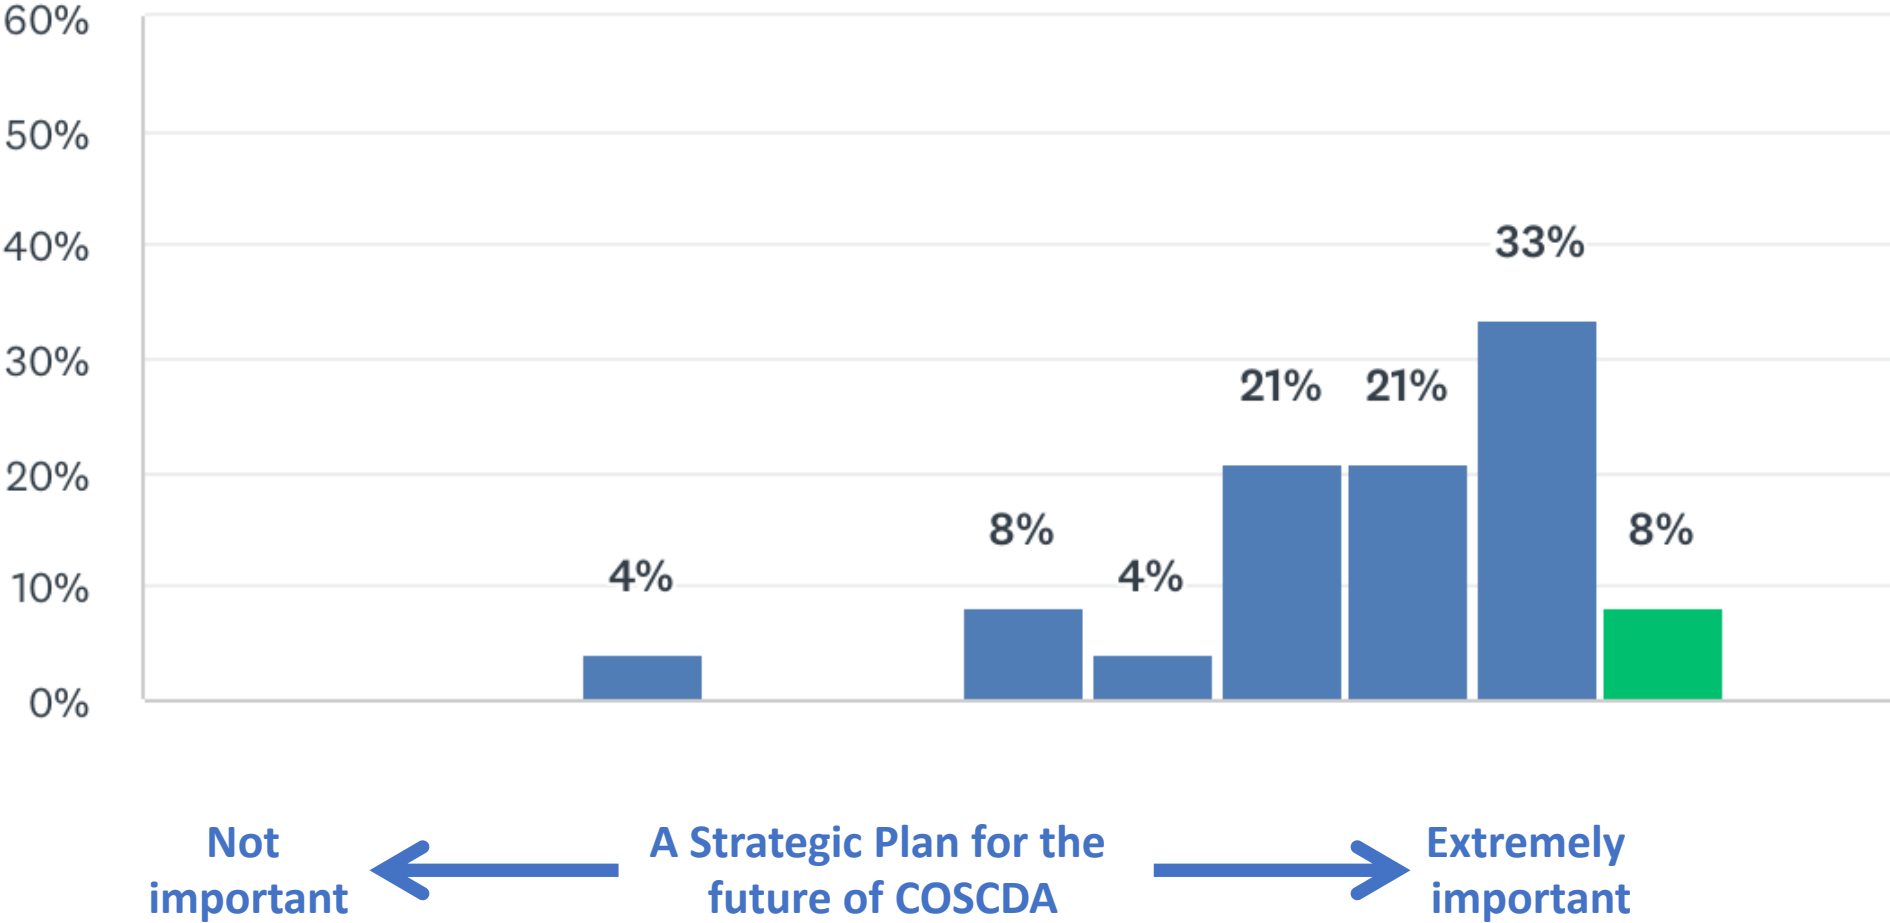

(i.e. a vision or perspective on the future that is shared organization-wide)

Scale: 1 = Not important; 10 = Extremely important

How important do you think it is to have a **SHARED STRATEGIC PLAN** that maps out a strategic future for COSCDA?

(Scale: 1 = Not important; 10 = Extremely important)

WELCOME TO THE  
**COUNCIL OF STATE COMMUNITY DEVELOPMENT  
AGENCIES STRATEGIC ACTION PLAN**  
PROJECT

## **The Importance of Future Thinking**

The key to effective future thinking...

Consider both **trajectory** (direction of change)  
and **velocity** (speed of change).

## The challenge for the Think-Tank

- Explore the future -
- Ask the hard questions -
- Think creatively -

The outcome may be a new view of the future.

# Key emerging trends shaping the future of COSCDA

# In a time of change and uncertainty....

- Which trends are being amplified and accelerated?
- What changes might be more elastic?
- Where are the potential tipping points?

Forces impacting the world, regions and people

What are the emerging macro drivers...

# Macro Trends and Forces of Change Related to . . .

- Demographics, population and mass urbanization
- Energy, food, water & climate change
- Technology driving change

# Demographics, population and mass urbanization

future→iQ

# Global Population Growth Is Driven By Developing Countries.

World population in billions, 1950-2050 (projected)

SOURCE: United Nations, *World Population Prospects*.

## Developed Countries Have Fewer Young People, but a Higher Share of Elderly.

## Developing Countries Have More Young People, and a Smaller Share of Elderly.

Blow in her face and she'll follow you anywhere

Hit her with tangy Tipalet Cherry. Or rich, grape-y Tipalet Burgundy. Or luscious Tipalet Blueberry. It's Wild! Tipalet. It's new. Different. Delicious in taste and in aroma. A puff in her direction and she'll follow you, anywhere. Oh yes.... you get smoking satisfaction without inhaling smoke.

Smokers of America do yourself a flavor. Make your next cigarette a **Tipalet**

New from Muriel. About 5 for 25¢.

For a better start in life  
start **COLA** earlier!

- Promotes Active Lifestyle!
- Boosts Personality!
- Gives body essential sugars!

### How soon is too soon?

Not soon enough. Laboratory tests over the last few years have proven that babies who start drinking soda during that early formative period have a much higher chance of gaining acceptance and "fitting in" during those awkward pre-teen and teen years. So, do yourself a favor. Do your child a favor. Start them on a strict regimen of sodas and other sugary carbonated beverages right now, for a lifetime of guaranteed happiness.

The Soda Pop Board of America  
1515 W. Hart Ave. - Chicago, ILL.

Shifting societal values

# Predictions and observations

- Generational change is coming which will trigger widespread upheaval of norms.
- People and industries will continue to cluster around mega-cities, in specialized cities and regional centers.

# Demographic + Population + Mass Urbanization

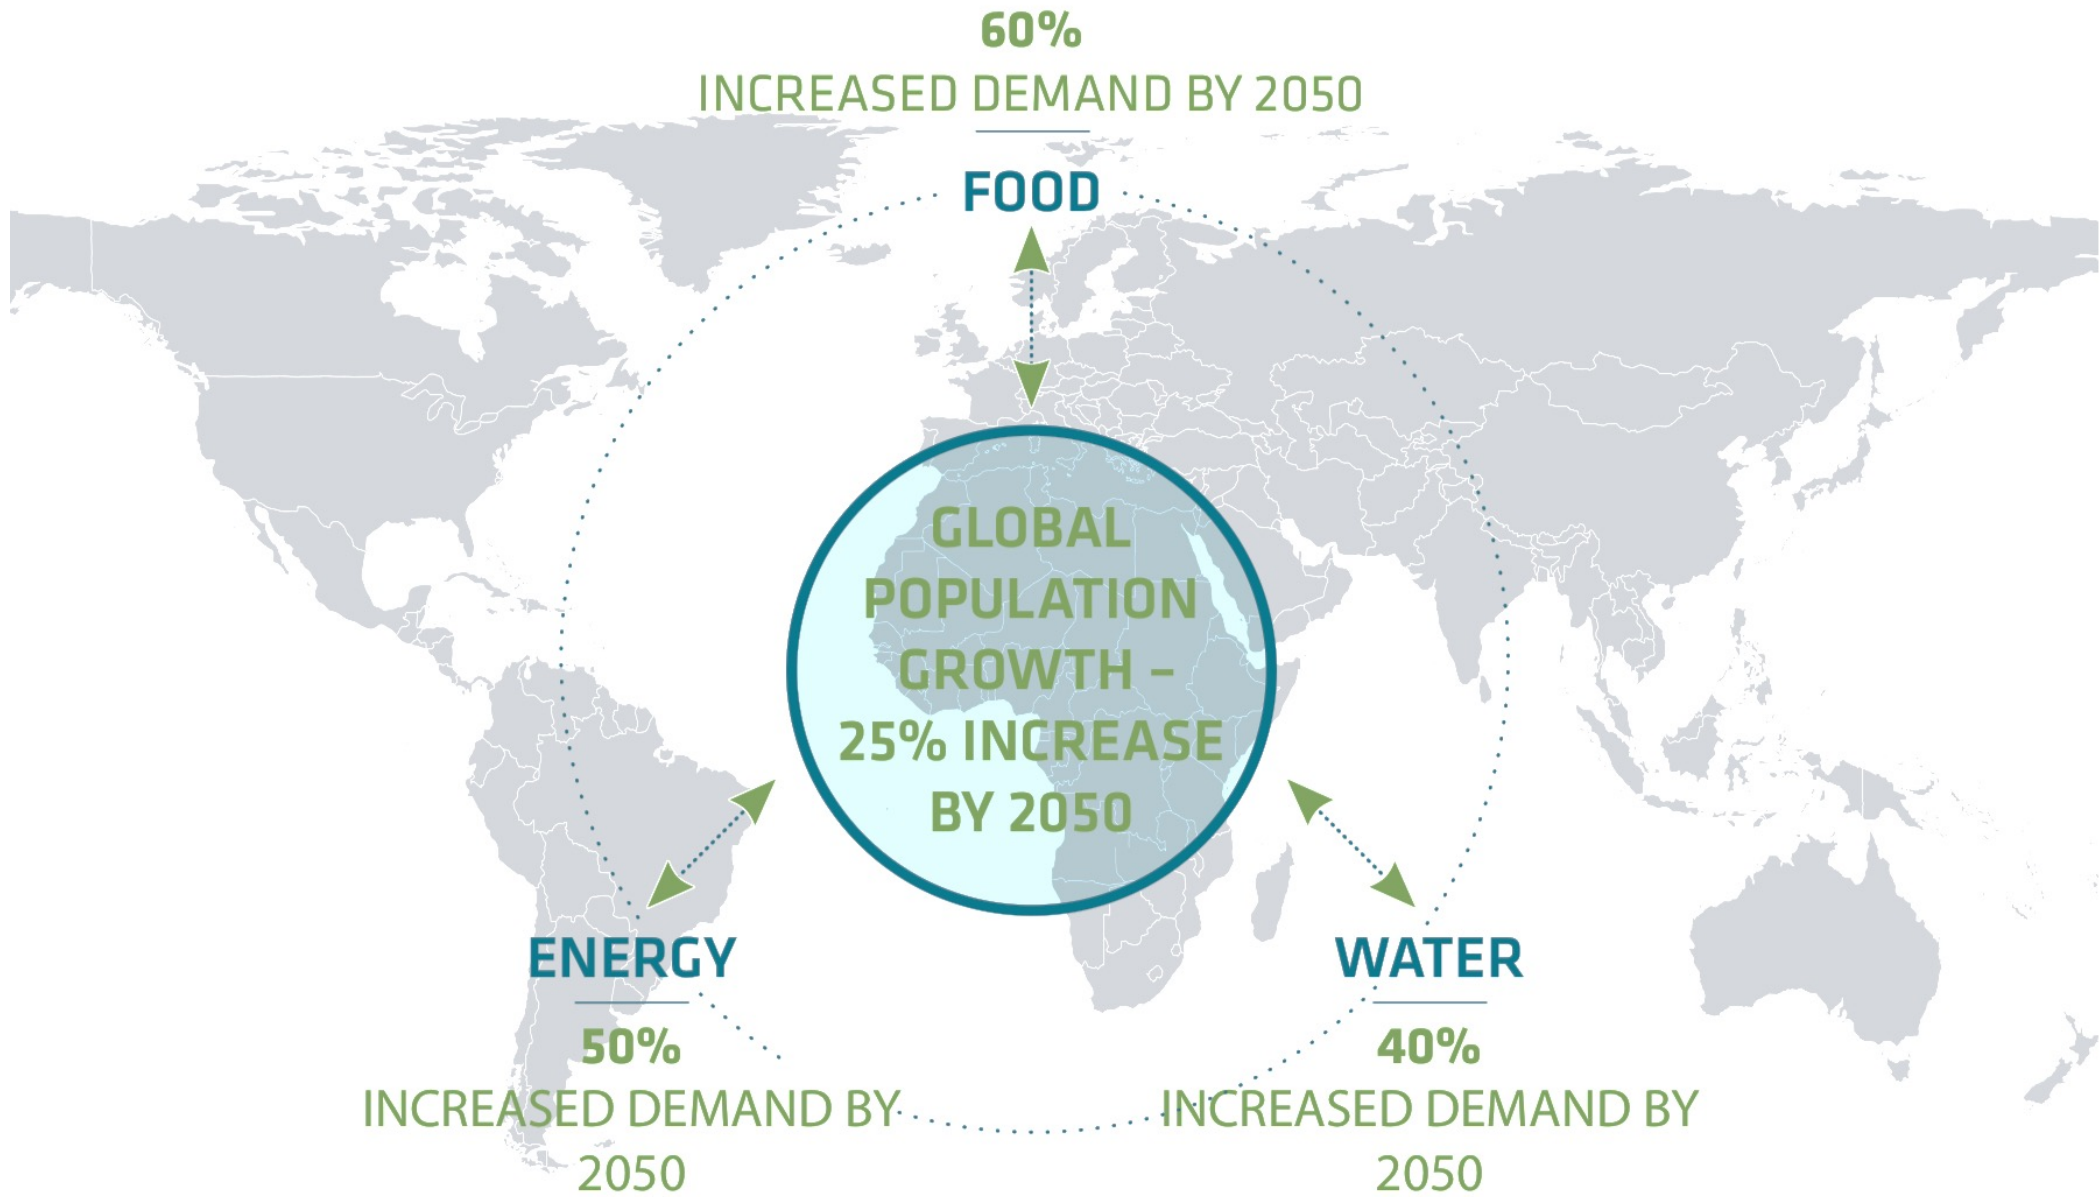

What does this mean for the  
the future of COSCDA?

# Energy + Water + Food + Climate Change

# Renewable Energy

Potential for  
unlimited  
cheap energy

Electrification of the  
world is accelerating,  
driven by renewable  
energy

# FRESH WATER

- Nearly 450 million people in 29 countries now face severe water shortages
- As much as 2/3 of the world population could be water-stressed by 2025
- Half the world's rivers and lakes are seriously polluted

**<2,5%**   **2.5-4.9%**   **5-14,9%**   **15-24,9%**   **25-34,9%**   **>35%**   **DATA NOT AVAILABLE**

Prevalence of undernourishment in the total population (percent) in 2018-20

Up to 811 million people – 1 in 10 of the global population – do not get enough to eat

Undernourishment is defined as the condition in which an individual's usual food consumption is insufficient to provide the amount of dietary energy required to maintain a normal, active lifestyle. The indicator is reported as the prevalence of undernourishment (PoU) which is an estimate of the percentage of individuals in the total population that are in a condition of undernourishment. To reduce the effects of possible seasonal effects in some of the underlying parameters, national estimates are reported as a three-year average (2018-2020). Data source: WFP estimates, 2021. The State of Food Security and Nutrition in the World 2021. For additional information on food security, nutritional status and agricultural productivity see the full report. WFP further elaborated a database of PoU estimates also available at <https://www.wfp.org/publications/2021/state-of-food-security-and-nutrition-in-the-world-2021>

# Projected impact of climate change on agricultural yields

**Increases and decreases**

**Food security and production capability rapidly becoming a more important global issue**

" A key culprit in climate change – carbon emissions – can also help agriculture by enhancing photosynthesis in many important (...) crops such as wheat, rice, and soybeans. The science, however, is far from certain on the benefits of carbon fertilisation."  
This map represents the case of beneficial carbon fertilisation processes.

Source: Cline W., 2007, *Global Warming and Agriculture*.

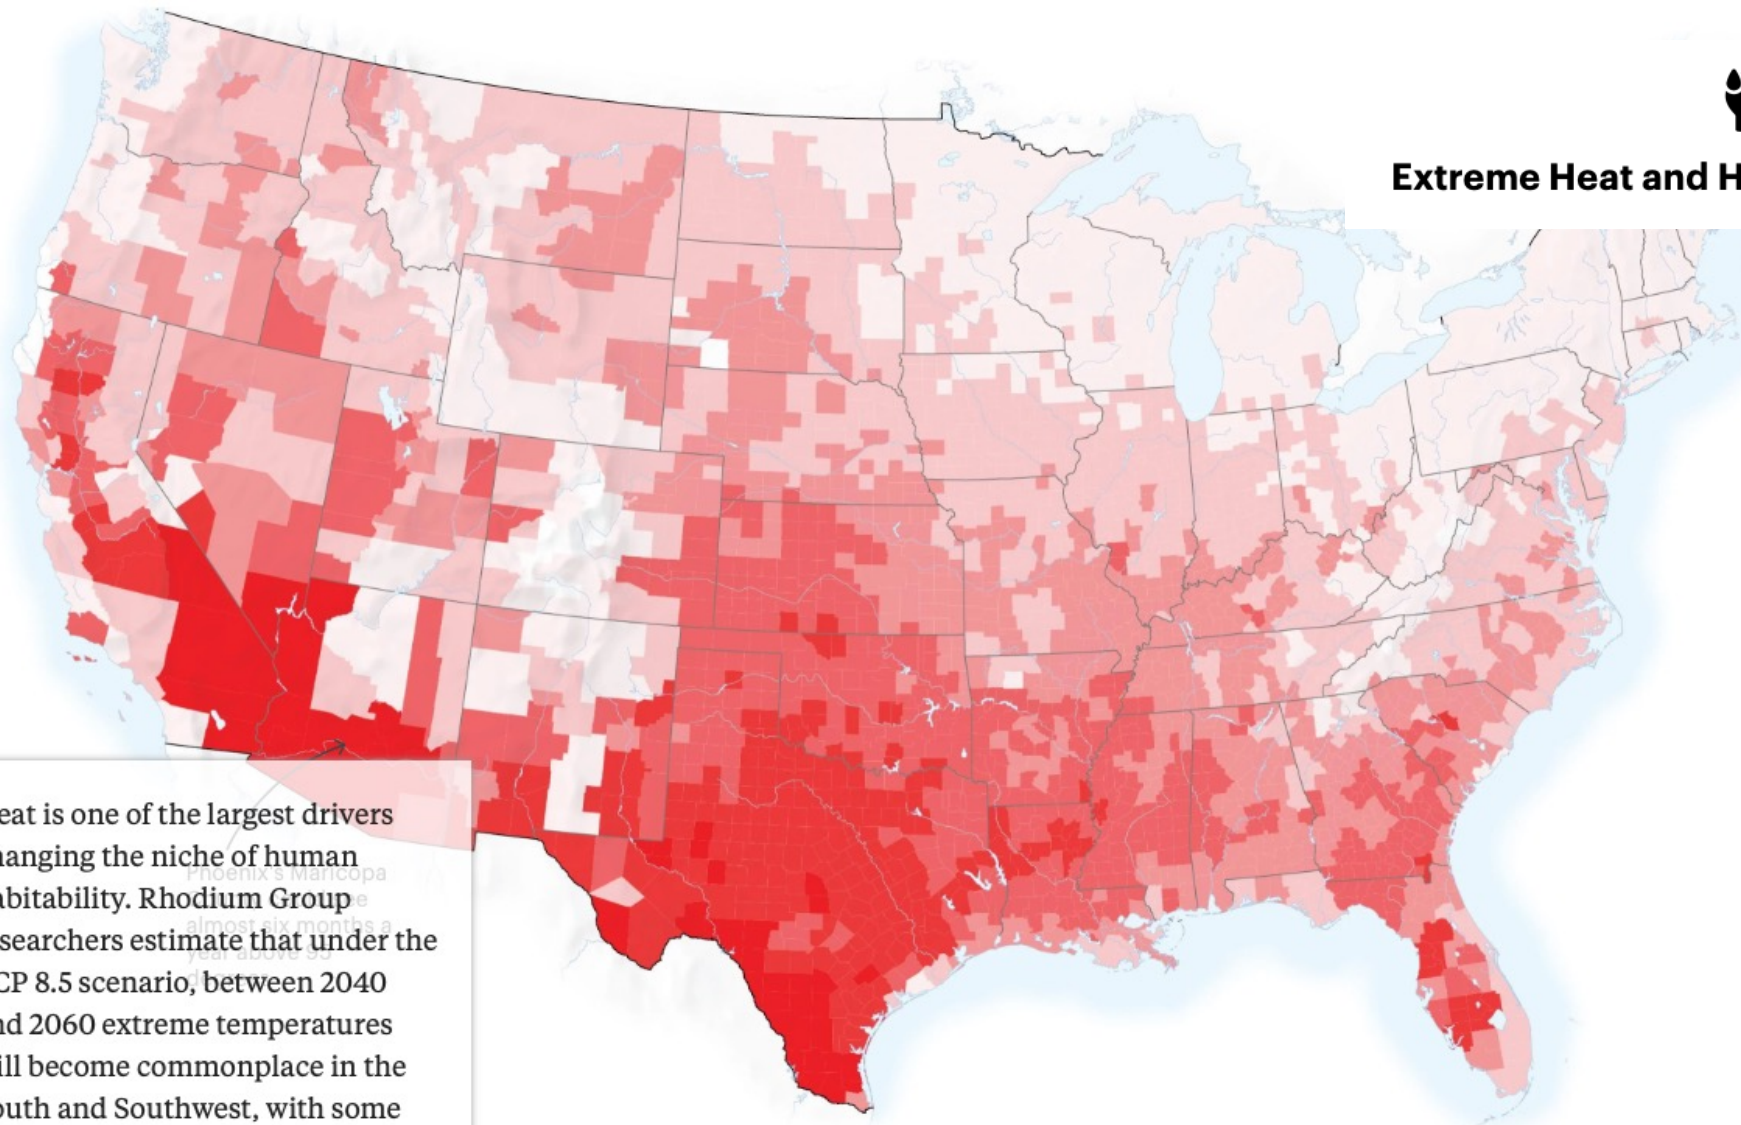

## Farm Crop Yields: 2040-2060

Corn and soy production is more sensitive to heat than drought, and it will decrease for every degree of warming. By midcentury, North Dakota (A), which already harvests millions of acres of both crops, will warm enough to allow for more growing days and higher yields. But parts of Texas and Oklahoma (B) may see yields drop by more than 70%.

## Extreme Heat and Humidity: 2040-2060

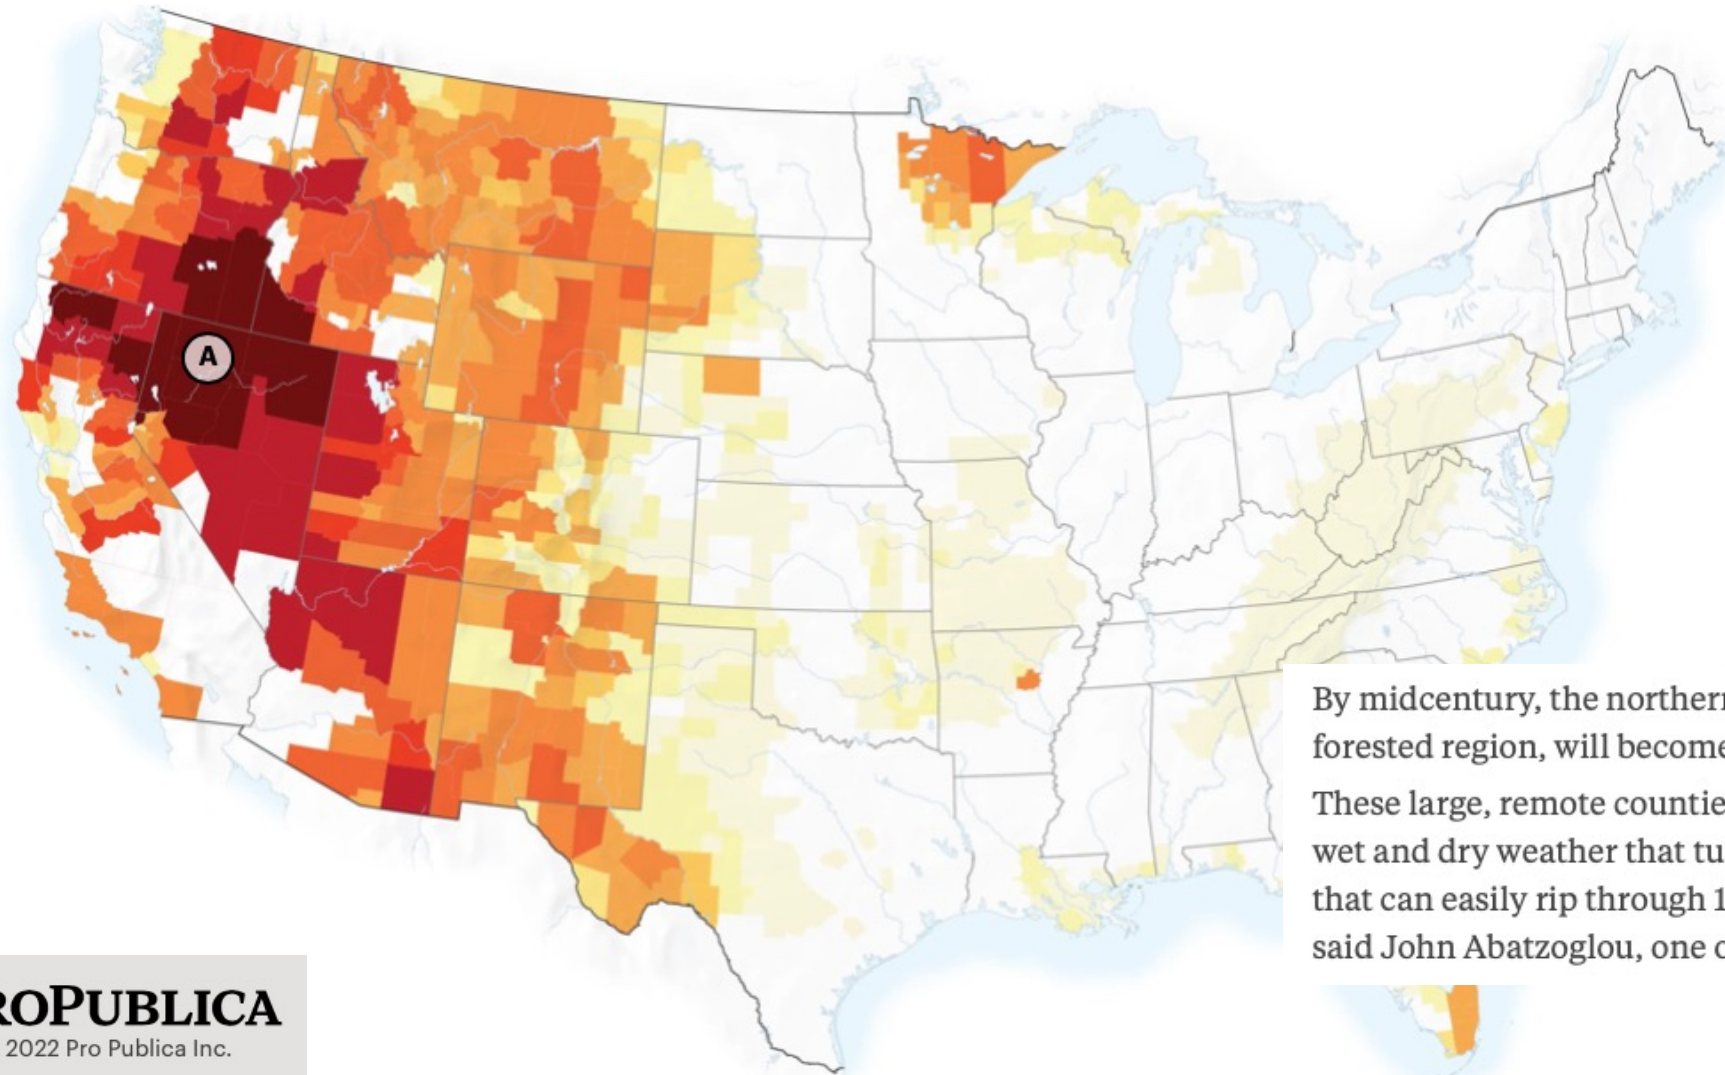

Heat is one of the largest drivers changing the niche of human habitability. Rhodium Group researchers estimate that under the RCP 8.5 scenario, between 2040 and 2060 extreme temperatures will become commonplace in the South and Southwest, with some counties in Arizona experiencing temperatures above 95 degrees for half the year.

High Emissions

## Large Wildfires: 2040-2071

By midcentury, the northern Great Basin, though not a densely forested region, will become the epicenter of large wildfires (A). These large, remote counties in Nevada and Oregon see cycles of wet and dry weather that turn the grassland into the fuel for fires that can easily rip through 10,000 acres a day with strong winds, said John Abatzoglou, one of the authors of the study.

High Emissions

Moderate Emissions

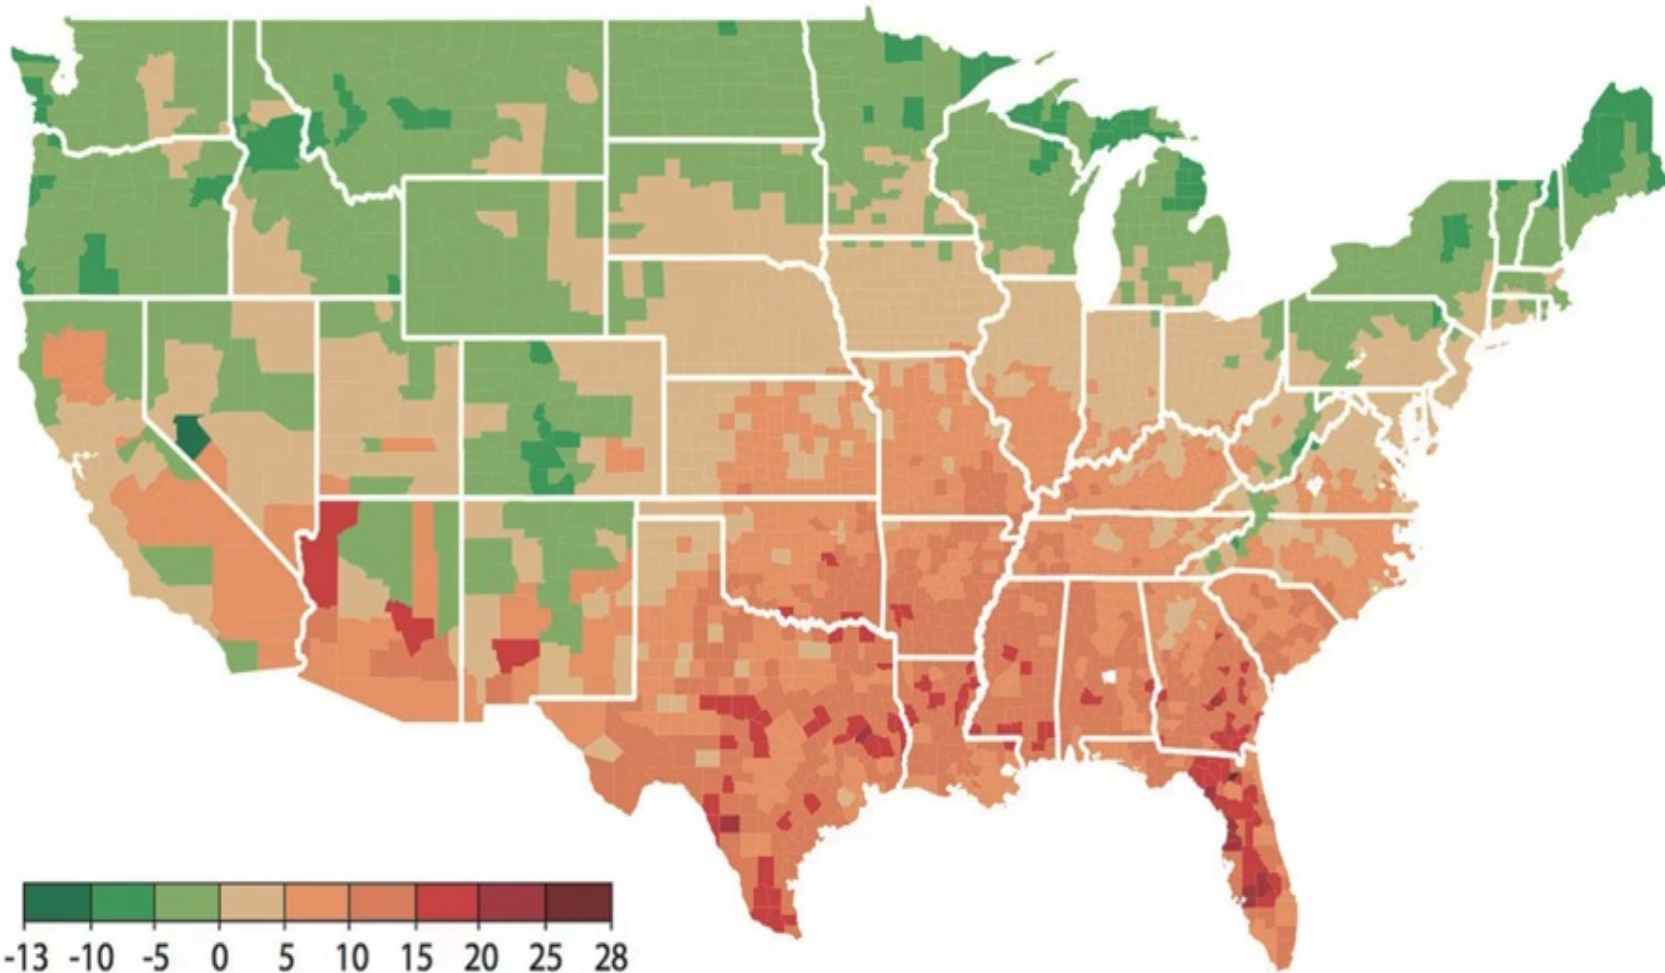

## Sea Level Rise: 2040-2060

Percentage of property below high tide

Some 50 million Americans live in eight of the largest U.S. metro areas — Miami (A), New York (B) and Boston (C) among them — which all lie in some of the most affected counties in the U.S.

# New Climate Maps Show a Transformed United States

by Al Shaw, Abrahm Lustgarten, ProPublica, and Jeremy W. Goldsmith,  
Special to ProPublica, September 15, 2020.

In the United States, that niche today blankets the heart of the country, from the Atlantic seaboard through northern Texas and Nebraska, and the California coast.

According to new data from the Rhodium Group analyzed by ProPublica and The New York Times Magazine, warming temperatures and changing rainfall will drive agriculture and temperate climates northward, while sea level rise will consume coastlines and dangerous levels of humidity will swamp the Mississippi River valley.

# Predictions and observations

- Growing disconnect between where food will be consumed, and where it can be grown.
- New migration patterns are emerging.

# Technology and the speed of change

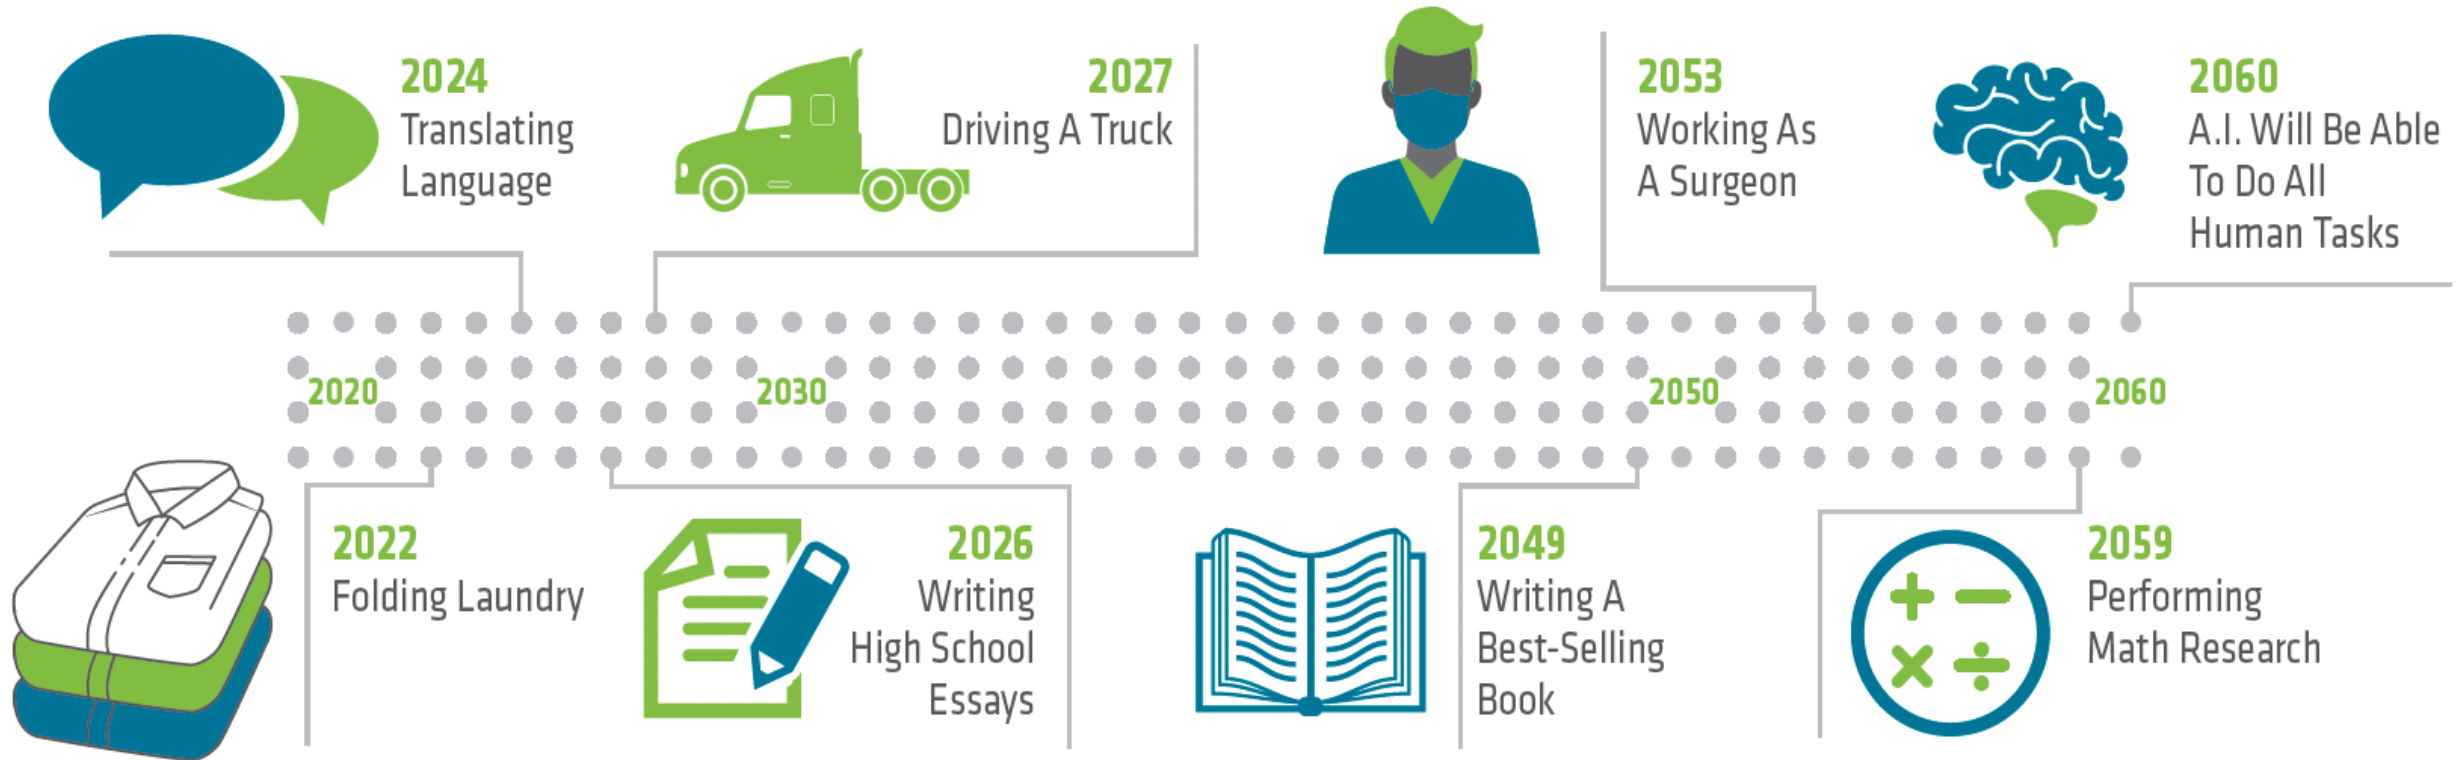

# THE INCREASING CAPABILITY OF DIGITAL TECHNOLOGIES

# When will AI outperform people?

**AI is reshaping our lives  
and industries – right  
now**

AI WILL LIKELY OUTPERFORM HUMANS AT...
